

*Description of Briquet's Tracing 7464.*

Briquet traced the L watermark, from the felt side, from the very clear image on f. 115r, with some minor inexactitudes, for instance in the point of the tail, which transferred into the published version. He records in pencil the source: "Arch. d'Udine Ann. 32", the measurements of the sheet: "29,5/43", and the date "1461", and a "13" for the position in the series of Griffons. The number for the Annales series "9024" and the final number in the repertory have both been added in red ink.

His indication of the date is erroneous by a year, since the gathering was written in the Autumn of 1462.
